1 Welcome to the Lionbridge Connector for Drupal 8 TMGMT

Welcome to the Lionbridge Connector for Drupal 8 TMGMT (Connector). This Connector enables you to automate sending and retrieving content from Drupal TMGMT to Lionbridge onDemand for translation, which dramatically reduces the effort required to create, maintain, and publish Web content in multiple languages.

1.1 The Translation Lifecycle

The *translation lifecycle* is the broad process of selecting content, sending it out for translation, and then receiving the translated content back from translation.

This set of steps usually fits inside a larger, more general process called the *content lifecycle*, which is the process of creating, reviewing, editing, approving, and publishing content.

When you consider the translation lifecycle and the content lifecycle together, you have the *global content value chain*, which is the strategy for managing multilingual content.

Remember that localizing content is a subset of steps in the broader content lifecycle. This will improve your focus on key localization considerations, improve processes, and keep all content stakeholders included. Together, this results in better content management.

1.2 Using this Help

Purpose of this guide

This guide describes how to use the Lionbridge Connector for Drupal TMGMT (Connector) to manage your translation lifecycle. It describes how to send out content for translation and receive it back from translation.

Who should use this guide

This guide is intended for content editors, project, marketing, localization or translation managers, or others who are responsible for creating, editing, or approving content for translation that resides in Drupal.

What your company setup should be

This document assumes that:

- Your company already is using Drupal and has installed the TMGMT module.
- Your company has created a Lionbridge onDemand account, at <https://ondemand.lionbridge.com>.

What you should already know

This document assumes that:

- You have a strong working knowledge of Drupal.
- You are familiar with your company's translation process and requirements.

- You have valid user credentials to log into Drupal.

Note: Not all the features described in this guide may be available. Feature availability depends on both your company's Drupal, TMGMT and Lionbridge Connector setup and the roles to which you are assigned. If you cannot access functionality that you need, contact your company's Drupal administrator.

How this guide is organized

This guide contains the following chapters:

Chapter	Description
"Welcome to the Lionbridge Connector for Drupal 8 TMGMT" on page 5	A brief description of the Lionbridge solution for Drupal TMGMT and how it fits into the translation lifecycle. It also includes information about this guide and Lionbridge Connectors Support contact information.
"Getting Started with the Lionbridge Connector for Drupal TMGMT" on page 11	How to get started and an overview of the Lionbridge Connector interface.
"Sending Content to Lionbridge onDemand" on page 34	How to send out Drupal content for translation.
"Tracking Your Translation Job" on page 59	How to monitor the translation status of content and jobs that you sent out for translation.
"Viewing and Reviewing Translated Jobs" on page 64	How to view and review translated content.
"Other Translation Tasks" on page 68	How to perform other translation tasks, such as: ■ aborting jobs ■ resubmitting aborted jobs ■ deleting jobs ■ editing translated content

Documentation conventions

This guide uses the following conventions:

Convention	Description
Bold	Highlights screen elements such as buttons, menu items, and fields.
<code>Courier</code>	Highlights input, file names, and paths.

Convention	Description
<i>Italics</i>	Highlights terms for emphasis, variables, or document titles.
>	Indicates a menu choice. For example, "Select Translation > Sources ."

1.3 Terminology

Content type	The content type of an item defines the fields it includes. For example, a basic <i>Page</i> content type has title and body fields. In Drupal, you can create custom content types.
Drupal	A free and open source content-management framework for building websites.
Job	One or more items that Drupal TMGMT groups together into a single translation job. All items in the job have the same target language. Before the Connector sends out a translation job to Lionbridge onDemand for translation, the quote for the job requires authorization.
Lionbridge	The publisher of the onDemand translation portal and a translation provider. Users connect to the onDemand translation portal to submit content to and retrieve content from the Lionbridge translation provider.
Lionbridge Connector for Drupal TMGMT (Connector)	The connector software that Lionbridge has developed and provides that plugs into your Drupal TMGMT installation to provide connectivity to the Lionbridge onDemand translation service. In this document it is referred to as the Connector. This is the software you are installing and configuring as you work through this document.
onDemand	A Lionbridge translation portal and a translation provider.
Provider	The term in the Drupal TMGMT module that describes a connector between the module and a translation provider. In the context of this help, the Lionbridge Connector for Drupal TMGMT is a translator in Drupal. It provides a direct connection to the Lionbridge onDemand translation service.
Source language	The original language of the content. Content is translated <i>from</i> the source language.
Target language	The translated language of the content. Content is translated <i>into</i> the target language.
TMGMT	The Translation Management Tool (TMGMT) module in Drupal provides a tool set for translating content from Drupal. It supports plug-ins from various translation providers, which it calls <i>providers</i> .

1.4 How to Contact Lionbridge Connector Support

Email @: connectors@lionbridge.com

Telephone: +1-416-363-0888

You can submit a support ticket either:

- by email
- from the Lionbridge Connectors Zendesk page, using your web browser

To submit a support ticket:

1. Do one of the following:

- Email connectors@lionbridge.com, and cc (carbon copy) anyone to include in the ticket correspondence.

Important: Include the information and attachments in your email that are listed in the sub-sections below.

- Create a ticket in Zendesk:

- a. Open the Lionbridge Connectors Zendesk page in your browser: <https://connectors.zendesk.com>.
- b. Sign in to Zendesk. If you do not have sign-in credentials, see "[To view and update your support ticket in Zendesk](#):" below.

Important: Include the information and attachments that are listed in the sub-sections below.

- c. Click **Submit a request**.
- d. In the **CCs** field, add anyone to include in the ticket correspondence.

Zendesk automatically creates a ticket and responds to everyone included in the cc field.

2. Everyone in the original cc receives updates unless they request to be removed from the ticket.

Important: Check your email spam folder (especially first-time Zendesk users) as sometimes email notifications from Zendesk are marked as spam.

When the issue is resolved, Lionbridge closes the ticket.

Information to include in the support ticket:

- client name
- CMS or content system name and version
- Connector or App version installed
- name of job for which the issue occurs
- date of job submission
- detailed description of the issue
- any error text—copy and paste, if applicable

Files to attach to the support ticket:

- CMS log files for the date the issue occurred
- log files for the date the issue occurred
- screen capture of the issue

To view and update your support ticket in Zendesk:

Important: You must log into Zendesk to view your support tickets there.

1. Open the Lionbridge Connectors Zendesk page in your browser: <https://connectors.zendesk.com>.
2. In the top-right corner, click **Sign in**, and enter your credentials.

Note: If you do not have sign-in credentials yet, then click either **Sign up** or **Get a password**, and follow the onscreen instructions.

A screenshot of the 'Sign in to Lionbridge Connectors' page. The page has a white background with a light gray border. At the top, the title 'Sign in to Lionbridge Connectors' is centered. Below the title are two input fields: 'Email' and 'Password'. Under the 'Password' field is a checkbox labeled 'Stay signed in'. A large, dark gray 'Sign in' button is centered below the checkbox. Below the button, the text 'Your credentials will be sent over a secure connection' is displayed. Further down are the links 'Cancel' and 'Forgot my password'. At the bottom, there are two links: 'New to Lionbridge Connectors? Sign up' and 'Have you emailed us? Get a password'. A small note at the very bottom states: 'If you've communicated with our support staff through email previously, you're already registered. You probably don't have a password yet, though.'

3. After signing in, click **My activities** to view the tickets you opened or where you are cc'd.
4. To update tickets, you can reply or attach files.

For more information, refer to "Submitting and tracking support requests" in Zendesk's *Help Center guide for end-users*, at: <https://support.zendesk.com/hc/en-us/articles/203664386-Help-Center-guide-for-agents-and-end-users>.

Important: Zendesk refers to a *support ticket* as a *support request*. These terms are interchangeable.

2 Getting Started with the Lionbridge Connector for Drupal TMGMT

The Lionbridge Connector for Drupal TMGMT is a plug-in to Drupal's Translation Management Tool (TMGMT) module. Its functionality is displayed to the users as part of Drupal TMGMT. The Lionbridge Connector supports all browsers that Drupal TMGMT supports.

The Connector supports Drupal 7 and 8. The version of the Connector described in this document supports Drupal 8. For information about Drupal 7 support, please contact Lionbridge Connectors Support. For details, see "[How to Contact Lionbridge Connector Support](#)" on page 8.

Before you set up the Connector, you must install and configure the TMGMT module, including adding the languages you require and configuring specific content types for translation. For detailed instructions, refer to the Drupal TMGMT documentation, at <https://www.drupal.org/node/1489984>.

After you install and configure this module, you complete the following steps:

1. You set up the Lionbridge Connector by *adding it as a provider* to Drupal. For detailed instructions, see "[Adding Lionbridge onDemand as a Provider in Drupal TMGMT](#)" on page 11.
2. You enable multilingual support for *content types* on your website. For detailed instructions, see "[Enabling Multilingual Support for Content Types on your Site](#)" on page 16.
3. You enable multilingual support for individual *fields* of each supported content type. For detailed instructions, see "[Enabling Multilingual Support for Individual Fields](#)" on page 17.

Note: By default, enabling multilingual support for content types automatically enables multilingual support for all the fields of that content type.

2.1 Adding Lionbridge onDemand as a Provider in Drupal TMGMT

Before you can send content directly from Drupal TMGMT to Lionbridge onDemand, you must add the Lionbridge Connector for Drupal TMGMT as a *provider* in Drupal TMGMT.

You may want to add Lionbridge onDemand as multiple providers in Drupal TMGMT, for example, if you want one workflow with a post-translation proofreader and one workflow that automatically accepts all translations without review.

To add Lionbridge onDemand as a provider in Drupal TMGMT:

1. In Drupal, select **Translation > Providers** from the menu.
The **Providers** page opens.
2. Click **Add provider**.

The **Add Provider** page opens.

Add Provider ☆

[Home](#) » [Administration](#) » [Translation](#) » [Providers](#)

Label *

The label of the provider.

Description

The description of the provider.

☐ Auto accept finished translations

This skips the reviewing process and automatically accepts all translations as soon as they are returned by the translation provider.

3. Enter the following information:

Note: An asterisk (*) indicates a required field.

Field	Description
Label	Your name for the Lionbridge Connector in Drupal TMGMT. This is what is displayed to users who select a translation provider ("provider") when sending out content for translation.
Description	A description of the provider.
Auto accept finished translations	Indicates whether to automatically accept all completed translations. ■ To automatically accept all translations without reviewing them first, select this check box. ■ To review translations before accepting them, clear this check box.
Provider plugin	Select <code>Lionbridge translator</code> from the dropdown list. This is the Drupal plug-in for the Lionbridge onDemand translation services.
Lionbridge Translator Plugin Settings	
Liondemand endpoint	Enter your Lionbridge onDemand endpoint URL, for example: <code>https://yourname.liondemand.com</code> . You receive this from Lionbridge after creating your account. ▶ To create your account, visit: https://ondemand.lionbridge.com/accounts/register/.
Lionbridge access key ID	Enter your Lionbridge access key ID. You can obtain this after you register your Lionbridge onDemand endpoint URL. ▶ To obtain your Lionbridge access key ID, sign in to your company's enterprise site: <code>https://yourname.liondemand.com</code>. In the Your Profile page, API Information section, click Create New Key.
Lionbridge access key	Enter your Lionbridge access key. You can obtain this after you register your Lionbridge onDemand endpoint URL. ▶ To obtain your Lionbridge access key, sign in to the Lionbridge onDemand website: https://ondemand.lionbridge.com. In the Your Profile page, API Information section, click Create New Key.
Purchase order number	Enter a valid purchase order number that you set up with Lionbridge onDemand staff.

- In the **Remote Languages Mappings** section, you map each language in Drupal TMGMT to the corresponding onDemand language code.

Each text box in this section has a label with the language name and code of each language set up in the Drupal TMGMT **Languages** page. (To open this page, select **Configuration > Regional and language > Languages** from the menu.)

For each language, select the onDemand language code corresponding to the Drupal language. The language codes displayed are specified in your configured onDemand endpoint.

5. Click **Save**.

The **Providers** page reopens, displaying the provider you just created.

6. In the **Operations** column, click **Edit** link beside the provider you just created, so that you can finish configuring your new provider. (Certain fields in Drupal TMGMT are not available when adding a provider.)

The **Edit provider** page opens, displaying the provider you just created.

7. Scroll down to the **Lionbridge Translator Plugin Settings** section, and enter the following information.

Field	Description
Default translation service	Select the appropriate Lionbridge service, as instructed by Lionbridge personnel.
Service type	Determines whether this provider sends out content for translation or updates the translation memory with previously translated content. This is one of the following: - Translation: This provider sends out content for translation to Lionbridge onDemand. - TM Update: This provider sends source and previously translated content to update the translation memory, so that it will be available for subsequent translation jobs. For more information about this feature, see "Sending Updates to a Translation Memory (TM)" on page 72.
Default currency	Select the default currency for transactions with Lionbridge onDemand.

8. Optional. Click **Lionbridge Account Info** to expand this section and view your account settings.

You can view the following information:

Field	Description
Email	The email address associated with your Lionbridge onDemand account.

Field	Description
Currency	The currency of your transactions with Lionbridge onDemand.
Total Spent	How much you already spent of your purchase order (PO).
Prepaid Credit	How much credit is still left on your purchase order (PO).
Product Count	How many translation orders you have placed previously.

9. Click **Save**.
10. If you want to add another provider to support another workflow, repeat the steps above.

2.2 Enabling Multilingual Support for Content Types on your Site

Before you can send content directly from Drupal TMGMT to Lionbridge onDemand, you must enable multilingual support on your Drupal website for each content type that you want to be able to send to onDemand for translation.

By default, the Connector supports sending out the following default *content types* for translation:

- article
- basic page
- translatable node

You can configure other, custom content types for translation.

Note: Lionbridge does not guarantee that other, custom content types are supported.

To enable multilingual support on your site:

1. In Drupal, select **Structure > Content types** from the menu.
2. Either click **Add content type** to add a new content type, or in the **Operations** column, click **Edit** to edit an existing content type.
3. At the bottom left, click the **Language settings** tab.

The **page** updates.

Edit Basic page content type ☆

4. Select the **Enable translation** check box.

5. Click **Save content type**.

Important: Repeat steps 2-5 for each content type that you want to be able to send out for translation.

2.3 Enabling Multilingual Support for Individual Fields

Before you can send content directly from Drupal TMGMT to Lionbridge onDemand, you must enable multilingual support for each field in each content type that you want to be able to send to onDemand for translation.

Note: By default, enabling multilingual support for content types automatically enables multilingual support for all the fields of that content type.

By default, the Connector supports sending out all the fields in the following default *content types* for translation:

- article
- basic page
- translatable node

You can configure other, custom fields for translation.

Note: Lionbridge does not guarantee that other, custom fields are supported.

To enable multilingual support for a field:

1. In Drupal, select **Structure > Content types** from the menu.
The **Content types** page opens.
2. In the **Operations** column, click **Manage fields** for a content type, for example for *Article*.

The **Manage fields** page opens, listing all the fields in that content type.

The screenshot shows the 'Manage fields' page for the 'Article' content type. The page has a breadcrumb trail: Home > Administration > Structure > Content types > Article. There is a '+ Add field' button. Below is a table with the following data:

LABEL	MACHINE NAME	FIELD TYPE	OPERATIONS
Body	body	Text (formatted, long, with summary)	Edit
Comments	comment	Comments	Edit
Image	field_image	Image	Edit
Tags	field_tags	Entity reference	Edit

3. In the **Operations** column, click **Edit** for the field to configure, for example for *Body*.

The **page** for the field settings opens.

4. Select the **Users may translate this field** check box.

5. Click **Save settings**.

Important: Repeat the previous steps for each field in each content type that you want to be able to send out for translation.

2.4 The Lionbridge Connector for Drupal TMGMT at a Glance

The Connector uses the Drupal TMGMT module's user interface for managing your translations with Lionbridge onDemand. You use the following pages to view manage your translations:

Page	How to Open	What It Displays	What You Can Do Here
Content page	Click the Content menu.	all content items, including those without an assigned language	view a list of items
Content overview page / Sources tab	Select Translation > Sources from the menu.	all items with an assigned language, both submitted and non submitted	view a list of items that have languages assigned
Job overview page / Jobs tab	Select Translation > Jobs from the menu.	all submitted jobs, including jobs that have finished	abort jobs, delete jobs, accept translations, open the Job page
Translation page / Cart tab	Select Translation > Cart from the menu.	all items that were added to the cart	select the target languages for a job and request translation, which opens the Job overview page
Job overview page (no displayed page name)	Click Request translation or Request translations in the following pages: ■ Translations of page for an item ■ Content overview page / Sources tab	a list of all items in a job, including word count, and fields for specifying the job settings	specify the job settings for the translation job for the specified target language
Job page (no displayed page name)	In the Job overview page / Jobs tab, click Manage .		authorize the quote for the translation job
Review Translation page (no displayed page name)	In the Job page, when the job is in Translated state, click Review .	source and target (translated) content	compare and update source content and its translation
View Translation page (no displayed page name)	In the Job page, when the job is in Accepted state, click View .	source and target (translated) content	compare source content and its translation

Important concepts in Drupal TMGMT

Request translation	Opens the Job overview page, where you group items into a translation job and add job parameters.
Submit to provider	Drupal TMGMT creates a job to translate specified items into specified target language and sends it to a provider (the Connector).
Add to cart	Adds selected items to the Cart.

2.5 Drupal TMGMT Icon Legend

Drupal TMGMT uses icons to indicate the translation state/status of source- and target-language items.

Source state/status icons in Drupal TMGMT

The following icons indicate the translation state/status of source-language items.

Icon	Description
	Indicates the source language of an item.
	Source item has not been translated.
	Source item has been translated.
	The translation of the source item is outdated, because the source item was updated after it was translated.

Target state/status icons in Drupal TMGMT

The following icons indicate the translation state/status of target-language items.

Icon	Description
	Translation has not been processed.
	Translation is in progress, or pending.
	Translation is ready for review.
	Translation has been reviewed.
	Translation has been auto-accepted.

2.6 Pre-Production Testing

After you complete the configuration, your Lionbridge Connector for Drupal TMGMT installation is ready for testing.

Once you have installed TMGMT and configured the Connector, we recommend adding our pseudo-translation service as a *provider* in Drupal TMGMT. This service enables you to test translations by automatically replacing every character in submitted content with the letter x. This enables you to test that the Connector is communicating correctly between Drupal TMGMT and Lionbridge onDemand, and it ensures that all the content you want translated is correctly extracted and handled by our services.

To add the pseudo-translation service as a provider in Drupal TMGMT:

1. In Drupal, select **Translation > Providers** from the menu.

The **Providers** page opens.

2. Click **Add provider**.

The **Add Provider** page opens.

Add Provider ☆

[Home](#) » [Administration](#) » [Translation](#) » [Providers](#)

Label *

Machine name: pseudo_translation_drupal [\[Edit\]](#)

The label of the provider.

Description

The description of the provider.

☐ Auto accept finished translations

This skips the reviewing process and automatically accepts all translations as soon as they are returned by the translation provider.

3. Enter the following information:

Note: An asterisk (*) indicates a required field.

Field	Description
Label	Your name for the Lionbridge Connector in Drupal TMGMT. This is what is displayed to users who select a translation provider ("provider") when sending out content for translation.
Description	A description of the provider.
Auto accept finished translations	Indicates whether to automatically accept all completed translations. ■ To automatically accept all translations without reviewing them first, select this check box. ■ To review translations before accepting them, clear this check box.
Provider plugin	Select <code>Lionbridge translator</code> from the dropdown list. This is the Drupal plug-in for the Lionbridge onDemand translation services.
Lionbridge Translator Plugin Settings	
Liondemand endpoint	Enter your Lionbridge onDemand endpoint URL, for example: <code>https://yourname.developer-sandbox.liondemand.com</code> . You receive this from Lionbridge after creating your account. ▶ To create your account, visit: https://developer-sandbox.liondemand.com/accounts/register/.
Lionbridge access key ID	Enter your Lionbridge access key ID. You can obtain this after you register your Lionbridge onDemand endpoint URL. ▶ To obtain your Lionbridge access key ID, sign in to the Lionbridge onDemand website: https://developer-sandbox.liondemand.com/. In the Your Profile page, API Information section, click Create New Key.
Lionbridge access key	Enter your Lionbridge access key. You can obtain this after you register your Lionbridge onDemand endpoint URL. ▶ To obtain your Lionbridge access key, sign in to the Lionbridge onDemand website: https://developer-sandbox.liondemand.com/. In the Your Profile page, API Information section, click Create New Key.
Purchase order number	Enter: 123456.

- In the **Remote Languages Mappings** section, you map each language in Drupal TMGMT to the corresponding onDemand language code.

Each text box in this section has a label with the language name and code of each language set up in the Drupal TMGMT **Languages** page. (To open this page, select **Configuration > Regional and language > Languages** from the menu.)

For each language, select the onDemand language code corresponding to the Drupal language. The language codes displayed are specified in your configured onDemand endpoint.

5. Click **Save**.

The **Providers** page opens, displaying the provider you just created.

6. In the **Operations** column, click **Edit** beside the provider you just created, so that you can finish configuring your new provider. (Certain fields in Drupal TMGMT are not available when adding a provider.)

The **Edit** page opens, displaying the provider you just created.

6. Scroll down to the **Lionbridge Translator Plugin Settings** section, and enter the following information.

Field	Description
Default translation service	Select Pseudo-translation drupal from the dropdown list.
Default currency	Select the default currency for transactions with Lionbridge onDemand.

7. If you want to add another provider to support another workflow, repeat the steps above.

We recommend sending only a few pages for translation in one language as an initial test. For detailed instructions, see ["Sending Content to Lionbridge onDemand"](#) on page 34. Once successful, you can send as many languages as required.

If you have any concerns or questions, please contact Lionbridge Connector Support. For details, see ["How to Contact Lionbridge Connector Support"](#) on page 8.

3 Sending Content to Lionbridge onDemand

Before you start sending content to Lionbridge onDemand for translation, make sure you have completed the following tasks:

- Lionbridge onDemand has been added as a provider in Drupal TMGMT. For detailed instructions, see ["Adding Lionbridge onDemand as a Provider in Drupal TMGMT"](#) on page 11.
- All relevant *content types* are configured for translation. For detailed instructions, see ["Enabling Multilingual Support for Content Types on your Site"](#) on page 16.
- All relevant *fields* are configured for translation. For detailed instructions, see ["Enabling Multilingual Support for Individual Fields"](#) on page 17.
- You have specified the language of the content to translate. You can do this while creating the content or afterward. For detailed instructions, see ["Specifying a Language for Content"](#) on page 35.

Which content?

When you send out content for translation, you send out one or more *items* of the following default *content types* for translation:

- article
- basic page
- translatable node

Note: Lionbridge does not guarantee that other, custom content types are supported.

You can send out both published and unpublished items for translation.

How to send?

There are different ways to approach sending out content for translation:

- You can send out one item or multiple items for translation.
- You can send out items for translation into one target language or into multiple target languages.
- You can send items either directly to Lionbridge onDemand or send them first to the Cart.

When you send out content for translation from Drupal TMGMT to Lionbridge onDemand, you complete the following general steps:

1. Optional. Send content to the *Cart*.

Important: The Cart facilitates collecting multiple items and grouping them for translation into jobs. This optimizes the translation process, and it is the recommended method for translating multiple items efficiently.

2. Submit content to the Connector.

- For instructions on submitting items directly to the Connector, see ["Submitting Content Directly to the Connector"](#) on page 38.
- For instructions on using the Cart to collect items before submitting them to the Connector, see ["Submitting Content to the Connector via the Cart"](#) on page 46.

When you submit items to the Connector, Drupal TMGMT automatically creates a separate translation job for each target language. For example, if you want to translate an item into three different languages, Drupal TMGMT will create three separate translation jobs.

3. Authorize the quote for the translation job. For detailed instructions, see ["Authorizing the Quote for a Translation Job"](#) on page 55.

The Connector then sends the authorized job to Lionbridge onDemand for translation.

Recommendation: Do not explicitly use Drupal TMGMT's built-in **Save Job** functionality, because it adds additional steps without adding any value when using the Lionbridge Connector. Instead, use the Cart to group multiple items together before sending them out for translation. Drupal TMGMT automatically creates a job for each group of items that it sends together for translation into the same target language.

Best practice: Optimize sending out content for translation. For large sites, do not send out translation by individual item. Instead, add items to the Cart and then send out multiple items for translation as a single job.

3.1 Specifying a Language for Content

You must specify a language for content before you submit to onDemand, because onDemand must know the source and target languages for all translation jobs. The language you specify is the *source* language for the translation job. The translators translate this content into the *target* languages.

- You can specify a language for an individual item:
 - while creating the item, as described in ["Specifying a Language while Adding an Item"](#) on page 35.
 - after creating the item, by editing it, as described in ["Specifying a Language while Editing an Item"](#) on page 37.
- You can specify the language for multiple items in the Cart, when you submit them to the Connector, by selecting the **Enforce source language** check box. For detailed instructions, see ["Submitting Items in the Cart to the Connector"](#) on page 50.

Important: To specify a language for content, your site must be set up for multiple languages. If you cannot specify a language, contact your Drupal administrator.

3.1.1 Specifying a Language while Adding an Item

You can specify a language while adding an item to your site.

To specify a language while adding an item:

1. Select **Content > Add content** from the menu to create a new item.

The **Add Content** page opens.

2. Click the link for the content type to create. For example, click the **Basic page** link.

The **Create <content type>** page opens. For example, the **Create Basic page** page opens.

3. In the **Language** dropdown list, select the language of the content.
4. Create your content and click **Save**.

3.1.2 Specifying a Language while Editing an Item

You can specify a language while editing an item.

To specify a language while editing an item:

1. Do one of the following:

- Click the **Content** menu to open the **Content** page, and then in the **Operations** column, click **Edit** for the item to edit. If necessary, you can filter the list of content items by title, content type, published status, and language, and then click **Filter**.

The screenshot shows the 'Content' management page. At the top, there are tabs for 'Content', 'Comments', and 'Files'. Below the tabs, there's a breadcrumb 'Home > Administration' and a '+ Add content' button. A filter section includes fields for 'Title', 'Content type' (set to '- Any -'), 'Published status' (set to '- Any -'), and 'Language' (set to '- Any -'). A 'Filter' button is below these. An 'Action' dropdown is set to 'Delete content', with an 'Apply to selected items' button. Below this is a table with columns: TITLE, CONTENT TYPE, AUTHOR, STATUS, UPDATED, and OPERATIONS. The table contains two rows: 'DRUPAL TRANSLATION SOFTWARE' and 'XXXXXX XXXXXXXXXXXX XXXXXXXX'. Both rows have an 'Edit' button in the OPERATIONS column.

☐	TITLE	CONTENT TYPE	AUTHOR	STATUS	UPDATED	OPERATIONS
☐	DRUPAL TRANSLATION SOFTWARE	Basic page	admin	Published	09/29/2017 - 13:01	Edit
☐	XXXXXX XXXXXXXXXXXX XXXXXXXX	Basic page	admin	Published	09/29/2017 - 13:01	Edit

- In the **location for the item**, click the **Edit** tab.

The **Edit <content type>** page opens. For example, the **Edit Basic page** page opens.

2. In the **Language** dropdown list, select the language of the content.
3. Click the appropriate **Save** button, depending on whether the item is published or unpublished.

3.2 Submitting Content Directly to the Connector

You can submit content from Drupal TMGMT directly to the Connector. This creates one job for each target language. You must then authorize the quote for each job so that the Connector sends it out to Lionbridge onDemand for translation.

When you submit content directly to the Connector, you complete the following general steps:

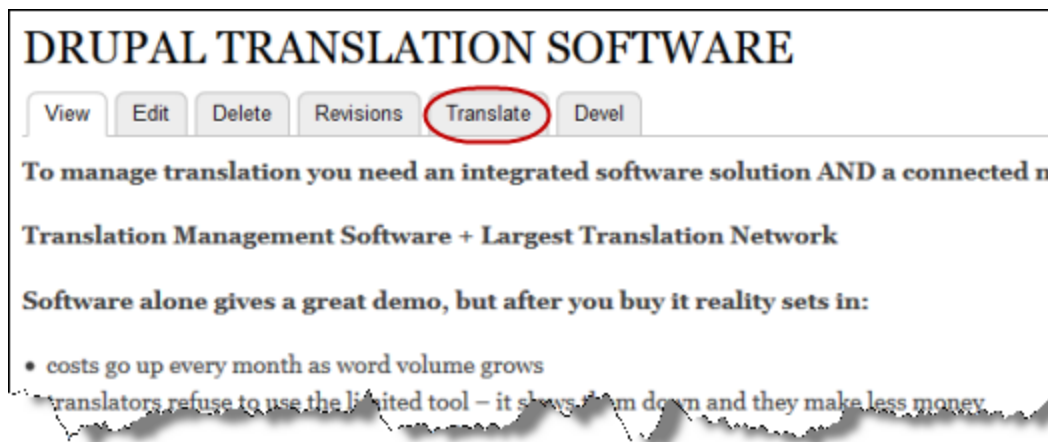

1. You submit one or multiple items to a *provider* (Drupal TMGMT's term for the Connector, or a connector to another translation provider). This creates one translation job for each target language. For detailed instructions, see:
 - ["Submitting One Item Directly to the Connector"](#) on page 39
 - ["Submitting Multiple Items Directly to the Connector"](#) on page 42
2. You authorize the quote for each translation job, so that the Connector can send it to Lionbridge onDemand. For detailed instructions, see: ["Authorizing the Quote for a Translation Job"](#) on page 55.

3.2.1 Submitting One Item Directly to the Connector

You can submit one item directly to the Connector. Drupal TMGMT creates a separate translation job for each target language. Afterward, you must authorize the quote for each job before the Connector sends it out to Lionbridge onDemand.

To submit one item immediately to the Connector:

1. In the **location for the item**, click the **Translate** tab.

The **Translations of** page opens.

This page displays all the languages set up for your site.

In the example above, the source language of the content is English. The Italian, German, and French languages are also set up for your site.

2. Select the check boxes for the languages into which you want to translate the item.

Tip: To select all available languages, select the check box in the column header.

Note: Do not click the **add translation** link for a language, because this opens the **Create <content type>** page, where you can enter the translation manually, instead of sending out the content for translation.

3. Click **Request translation**.

The **Checkout** page opens. A message at the top states that you need to check out the jobs. The number of jobs you need to check out is the same as the number of target languages you selected earlier. Recall that Drupal TMGMT creates a separate job for each target language.

The screenshot shows the 'DRUPAL TRANSLATION SOFTWARE (English to German, Unprocessed)' checkout page. At the top, a green message bar states '2 jobs need to be checked out.' Below this, there's a 'Label' input field. A note says: 'You can provide a label for this job in order to identify it easily later on. Or leave it empty to use the default one.' The 'Source language' is set to 'English' and the 'Target language' is set to 'German'. The 'Total words' is 153 and 'Total HTML tags' is 67. The 'CONFIGURE PROVIDER' section shows 'Provider' set to 'Lionbridge Pseudo (nick)'. The 'CHECKOUT SETTINGS' section has 'Project title' set to 'DRUPAL TRANSLATION SOFTWARE'. On the right, the 'JOB ITEMS' table shows one item: 'DRUPAL TRANSLATION SOFTWARE' of type 'Content (Basic page)' with 153 words. At the bottom, there are buttons for 'Submit to provider and continue', 'Save job', and 'Delete'. A 'TRANSLATION JOB MESSAGES' section indicates 'There are no messages yet in this Job.' The 'State' is 'In progress'.

4. Use this page to specify the job settings for the translation job for the specified target language.

Field	Description
Label	Optional. You can enter a name for the translation job. This is the name that is displayed in Drupal. If you leave this blank, the default job name is the name of the item.
Target language	Select the target language for the job. You can select any of the target languages you specified earlier, in step 2.
Total words	Read only. The number of words in the item.

Field	Description
Total HTML tags	Read only. The number of HTML tags in the item.

- Optional. Click **Load suggestions** to display the **Suggestions** section, where Drupal TMGMT lists any similar items that you can send out for translation.
- In the **Configure Provider** section, in the **Provider** list, select the provider you added for Lionbridge onDemand in ["Adding Lionbridge onDemand as a Provider in Drupal TMGMT"](#) on page 11.

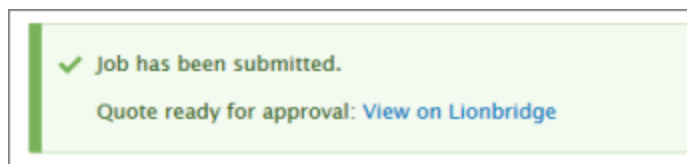

Tip: There may be multiple providers if your company set up multiple workflows to use with onDemand. For example, there may be one workflow with approvals and one workflow without approvals. Alternatively, there may be multiple providers if your company is using the TM update feature to send source and previously translated content to a translation memory, so that it will be available for subsequent translation jobs. For more information about this feature, see ["Sending Updates to a Translation Memory \(TM\)"](#) on page 72.

- Optional. In the **Checkout Settings** section, in the **Project Title** field, you can modify the project name. By default, the project name is the name of the item. This is the project name in onDemand.
- Do one of the following:
 - If you selected multiple target languages for this item in step 2, and this is not the last one to submit, then click **Submit to provider and continue**.
 - If you selected one target language for this item in step 2, or if you selected multiple target languages but this is the last one to submit, then click **Submit to provider**.

Drupal TMGMT creates a job to translate this item into this target language.

- If you clicked **Submit to provider and continue**, then this page reopens for the next target language to process. Repeat steps 4-8 for each target language.

A **message** at the top of the page states that the job has been submitted and the quote is ready for approval. Optional. You can click the **View on Lionbridge** link to open the Lionbridge onDemand site, where you can view your quote.

10. If you clicked **Submit to provider**, then the **Translations of** page re-opens, displaying a message at the top of the page that the job has been submitted and the quote is ready for approval. Optional. You can click the **View on Lionbridge** link to open the Lionbridge onDemand site, where you can view your quote.

You can now view the jobs you submitted on the **Job overview** page (**Jobs** tab). You must authorize the quote for each job so that the Connector sends it out to Lionbridge onDemand for translation. For detailed instructions, see "[Authorizing the Quote for a Translation Job](#)" on page 55.

3.2.2 Submitting Multiple Items Directly to the Connector

You can submit multiple items directly to the Connector. Drupal TMGMT creates a separate translation job for each target language. Afterward, you must authorize the quote for each job before the Connector sends it out to Lionbridge onDemand.

To submit multiple items immediately to the Connector:

1. Select **Translation > Sources** on the menu to open the **Content overview** page (**Sources** tab).

9. If you want to submit these items for translation to another target language, repeat steps 3-8 for that language.

You can now view the job or jobs you submitted/checked out on the **Job overview** page (**Jobs** tab). You must authorize the quotes for these jobs so that the Connector sends them out to Lionbridge onDemand. For detailed instructions, see "[Authorizing the Quote for a Translation Job](#)" on page 55.

3.3 Submitting Content to the Connector via the Cart

The *Cart* is a place to collect items for translation before sending them to the Connector, which automatically groups them into jobs.

Using the Cart has the following advantages:

- If the person with the authority to send content for translation from the Cart manages your organization's translation budget, it can help control translation costs and the translation process.
- You may not want to send out each item individually as soon as you finish reviewing it. The Cart facilitates your management of reviewed content, so that you do not forget about sending individual reviewed items for translation.
- Lionbridge onDemand prefers receiving fewer but larger batches of content to translate, rather than individual items, as this facilitates project preparation, resource assignment, and file analysis.
- If you want to translate many items into multiple languages, but you want to translate into only one target language at a time, this is a good way to manage that process.

If you or your colleagues have added items to the Cart, you must access it to submit the items to the Connector.

Note: If you do not send out items from the Cart to the Connector and authorize the quotes for the corresponding jobs, then the Connector does not send out the translation jobs to Lionbridge onDemand.

When you use the Cart to manage your translation process, you complete the following general steps:

1. You add items to the Cart, as described in:

- ["Adding One Item to the Cart"](#) on page 46
- ["Adding Multiple Items to the Cart"](#) on page 48

Optional. You can also remove items from the Cart, if you decide not to translate them. For detailed instructions, see ["Removing Items from the Cart"](#) on page 50.

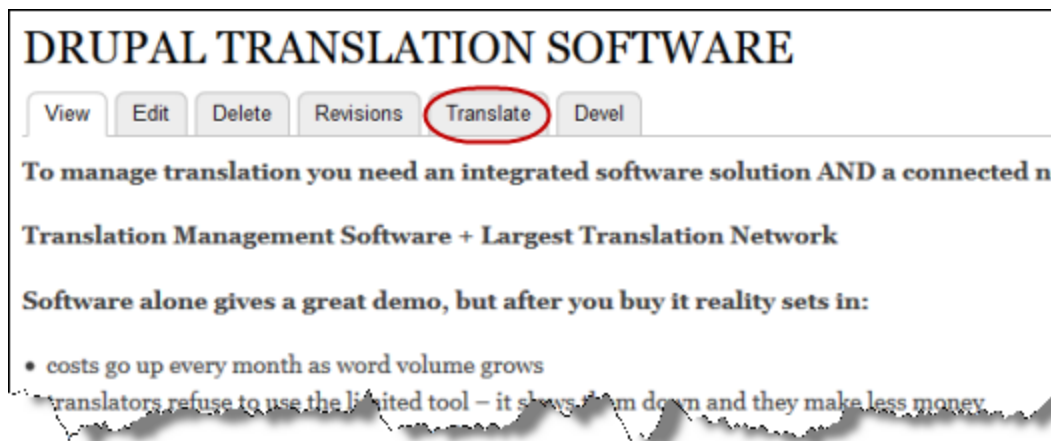

2. You submit items from the Cart to the Connector, as described in ["Submitting Items in the Cart to the Connector"](#) on page 50. You can send out one, multiple, or all items from the Cart at one time. This step creates one job for each target language.
3. You authorize the quote for each translation job, so that the Connector sends it out to Lionbridge onDemand for translation. For detailed instructions, see ["Authorizing the Quote for a Translation Job"](#) on page 55.

3.3.1 Adding One Item to the Cart

You can add one item to the Cart, so that later you can submit it to the Connector. For an explanation of using the Cart to submit content to the Connector, see ["Submitting Content to the Connector via the Cart"](#) on page 46.

To add one item to the Cart:

1. In the **location for the item**, click the **Translate** tab.

The **Translation** of page opens.

Type	The content type of the item.
Content	The title of the item.
Language	The source language of the item.

2. Select the check boxes of items in your cart to send out for translation.

Tip: To select all the items in your cart, select the check box in the column heading.

- Optional. Select the **Enforce source language** check box. This enables you to change the language specified for an item before sending it out for translation. It displays the **Source Language** dropdown list, where you can change the source language specified for an item.

Best practice: In general, you should specify the language while creating or editing the item, as described in ["Specifying a Language for Content"](#) on page 35. Therefore, selecting this check box should not be necessary.

- In the **Request translation into language/s** list, select the target languages, into which to translate the content.
- Click **Request translation**.

Cart ☆

Home » Administration » Translation

TYPE	CONTENT	LANGUAGE
☒ Content (Basic page)	My second test page	English
☒ Content (Basic page)	My test page	English

☐ Enforce source language
The source language is determined from the item's source language. If you wish to enforce a different language you can select one after ticking this checkbox. In such case the translation of the language you selected will be used as the source for the translation job.

Request translation into language/s

English
German
French
Italian

If the item's source language will be the same as the target language the item will be ignored.

Request translation Remove selected Empty cart

This creates one job for each specified target language. If there are multiple items in the cart, they are combined into a single job. For example, suppose there are two items (Item A and Item B) in the cart that you want to translated into three target languages (French, German, Polish). In this scenario, Drupal TMGMT creates three jobs, one for each language. Each job contains two items.

The **Job overview** page opens. A message at the top states that you need to check out the jobs. The number of jobs you need to check out is the same as the number of target languages you selected earlier. Recall that Drupal TMGMT creates a separate job for each target language.

State: In progress Needs review

6. Use this page to specify the job settings for the translation job for the specified target language.

Field	Description
Label	Optional. You can modify the job name. By default, the job name starts with the name of the first item selected from the cart. This is the name that is displayed in Drupal.
Source language	Read only. The source language of the content.
Target language	Select the target language for the job. You can select any of the target languages you specified earlier, in step 4, in the Translation page. Reminder: There is only one target language per job.
Total words	Read only. The number of words in the selected items.

Field	Description
Total HTML tags	Read only. The number of HTML tags in the selected items.

7. Optional. In the **Job Items** section, you can delete any items from your job.
8. Optional. Click **Load suggestions** to view any other items that may be suitable to include in this job. The **Suggestions** sub-section opens, displaying any suggested items to check out with these items. To add suggested items, select the corresponding check boxes.
9. In the **Configure Provider** section, in the **Provider** dropdown list, select the provider you added for Lionbridge onDemand in ["Adding Lionbridge onDemand as a Provider in Drupal TMGMT"](#) on page 11.

Tip: There may be multiple providers if your company set up multiple workflows to use with onDemand. For example, there may be one workflow with approvals and one workflow without approvals. Alternatively, there may be multiple providers if your company is using the TM update feature to send source and previously translated content to a translation memory, so that it will be available for subsequent translation jobs. For more information about this feature, see ["Sending Updates to a Translation Memory \(TM\)"](#) on page 72.

10. Optional. In the **Checkout Settings** section, in the **Project Title** field, you can modify the project name. By default, the project name is the name of the item. This is the project name in onDemand.

Tip: If you modified any fields, such as the **Label** or **Project title**, you can click **Save job** to save a draft of the job before submitting it.

11. Do one of the following:
 - If you selected multiple target languages for items in the Cart in step 4, and this is not the last one to submit, then click **Submit to provider and continue**.
 - If you selected one target language for items in the Cart in step 4, or if you selected multiple target languages but this is the last one to submit, then click **Submit to provider**.

The page updates, and a message at the top of the page states that the job has been submitted, and the quote is ready for approval. You can click the **View on Lionbridge** link to view the quote on the Lionbridge onDemand website.

12. If you specified additional target languages for translation, complete steps 6-11 for each target language, which corresponds to a separate job.

After you submit jobs for each target language you specified earlier, the **Job overview** page reopens.

After you check out the last job for the last target language, you can view the job or jobs you submitted/checked out on the **Job overview** page (**Jobs** tab). You must authorize the quotes for these jobs so that the Connector sends them out to Lionbridge onDemand. For detailed instructions, see ["Authorizing the Quote for a Translation Job"](#) on page 55.

3.4 Authorizing the Quote for a Translation Job

After you submit a job to the Connector, you must authorize the quote for the job before the Connector sends it to Lionbridge onDemand. For instructions on submitting a job to the Connector, see:

- ["Submitting One Item Directly to the Connector" on page 39](#)
- ["Submitting Multiple Items Directly to the Connector" on page 42](#)
- ["Submitting Items in the Cart to the Connector" on page 50](#)

Note: Drupal TMGMT creates a separate translation job for each target language. You must authorize each job separately.

To send out a job for translation:

1. Select **Translation > Jobs** from the menu.

The **Job overview** page (**Jobs** tab) opens.

Note: Click **Save Job** only if you modify the **Label** field, which is your name for the Connector.

You can view translation-status updates by clicking **Poll translations**. For detailed instructions, see ["Tracking Your Translation Job"](#) on page 59.

4 Tracking Your Translation Job

After you authorize the quote for your translation job, the Connector sends the job to Lionbridge onDemand for translation.

You can track the progress of this job on the **Job overview** page (**Jobs** tab).

Tip: Drupal TMGMT provides icons that indicate the translation state/status of source- and target-language items. For a list and descriptions of these icons, see "[Drupal TMGMT Icon Legend](#)" on page 27.

To track your translation job:

1. Select **Translation > Jobs** from the menu.

The **Job overview** page (**Jobs** tab) opens.

Job overview ☆

Dropdown List	Description
State	The state of the translation job. This is one of the following: ■ Unprocessed: The job has not been submitted to the Connector. It may be in the Cart. ■ Pending: The job has been submitted to the Connector. The quote may have been approved. ■ Rejected: The job has been submitted to the Connector, but it was rejected. This occurs if the payment information is incorrect, for example if there is an insufficient balance in the purchase order (PO) after you try to authorize the quote. ■ Aborted: The job was aborted when it was in <code>Pending</code> state. ■ Translated: The job was accepted and the translated item was created in Drupal. ■ Reviewed: The translated item in Drupal was reviewed. ■ Accepted: The job was auto-accepted and the translated item was created in Drupal.
Source language	The source language of the content.
Target language	The target language into which the content is translated.
Provider	The provider set up in Drupal TMGMT for translating the content. In this case, it is your company's name for Lionbridge onDemand, set up in "Adding Lionbridge onDemand as a Provider in Drupal TMGMT" on page 11.

3. To view additional information about a job, in the **Operations** column, click **Manage**.

The **page** for that job opens.

State: ⌚ In progress ▲ Needs review

4. Click **Poll translations** to update Drupal with the job status, and update Drupal TMGMT with any translated content. Clicking this button also retrieves a new message in the **Messages** section.

CREATED	MESSAGE	NAME
Mon, 10/30/2017 - 17:10	Translation in progress.	admin
Fri, 10/27/2017 - 17:22	Quote ready for approval: View on Lionbridge	admin
Fri, 10/27/2017 - 17:06	Job has been submitted.	admin
Fri, 10/27/2017 - 17:06	Quote ready for approval: View on Lionbridge	admin

The following table describes the updates you can receive:

State in "Job Items" section	Status in "Provider Information" section	Message in Message section	Description
In progress	Pending	Job has been submitted.	Job was submitted to Connector, but quote has not been authorized.
In progress	Pending	Quote ready for approval: View on Lionbridge	Job was submitted to Connector, but quote has not been authorized.
In progress	Authorized	Translation in progress.	Quote for job has been authorized.
Needs review (review scenario)	Translated	The translation of <i>job-name</i> is finished and can now be reviewed.	The translation is ready for review.
Accepted (review scenario)	Reviewed	The translation for <i>job-name</i> has been accepted.	The translation has been reviewed.
Accepted (non-review scenario)	Accepted	The translation job has been finished.	The translation is complete, and it does not require review.
		The translation for <i>job-name</i> has been accepted.	

5. Once the **Status** is **Translated**, in the **Operations** column, you can click **Review** to view the translated content. For detailed instructions, see "[Viewing and Reviewing Translated Jobs](#)" on page 64.

5 Viewing and Reviewing Translated Jobs

When you monitor translation jobs, as described in ["Tracking Your Translation Job"](#) on page 59, you click **Poll translations** in the Job page to retrieve status updates. This also automatically retrieves translated content from Lionbridge onDemand, once it is available.

After the Connector retrieves the translated content and saves it in Drupal, it is ready for review.

Depending on the Connector setup in Drupal TMGMT, you may need to approve translated content before it can be published. This is determined by the **Auto accept finished translations** setting in the **Edit Provider** page, as described in ["Adding Lionbridge onDemand as a Provider in Drupal TMGMT"](#) on page 11:

As soon as the translation job is finished, the provider status changes from *Authorized* to *Translated*, because Lionbridge onDemand has completed the translation job. In addition:

- If the **Auto accept finished translations** check box is selected for the provider, the job state changes from *In progress* to *Accepted*. You *can view* these translations. For detailed instructions, see ["Viewing One Translated Job"](#) on page 64.
- If the **Auto accept finished translations** check box is cleared for the provider, the job state changes from *In progress* to *Needs review*. In this scenario, you *must review* the translations and then accept or reject them. For detailed instructions, see ["Reviewing One Translated Job"](#) on page 65.

5.1 Viewing One Translated Job

If the **Auto accept finished translations** check box is *selected* for the provider (the Connector), you can view translated content. However, you cannot modify it here, because it has been automatically accepted. For instructions on editing translated content, see ["Editing Translated Items"](#) on page 70.

To view the translation of one job:

1. If the Job page is not already open:
 - a. Select **Translation > Jobs** from the menu to open the **Job overview** page (**Jobs** tab).
 - b. Optional. Use the filter bar at the top of the page to locate the job to review. The job is in *Accepted* state.
 - c. In the **Operations** column of the job to review, click **Manage** to open the Job page.
2. In the **Job Items** section, in the **Operations** column, click **View**.

The **View Translation** page opens.

- The **Source** fields on the left side display the source content.
- The **Translation** fields on the right side display the translated content. In these examples, pseudo-translation is displayed instead of actual translated content.

The fields displayed here depend on the fields in the content type.

3. When you are done, click **Cancel** to return to the Job page.

5.2 Reviewing One Translated Job

If the **Auto accept finished translations** check box is *cleared* for the provider (the Connector), the translation requires review as part of the translation-management process.

To review the translation of one job:

1. If the Job page is not already open:
 - a. Select **Translation > Jobs** from the menu to open the **Job overview** page (**Jobs** tab) .
 - b. Optional. Use the filter bar at the top of the page to locate the job to review. The job is in **Translated** state.

- c. In the **Operations** column of the job to review, click **Manage** to open the Job page.
2. In the **Job Items** section, in the **Operations** column, click **Review**.

The **Review Translation** page opens.

- The **Source** fields on the left side display the source content.
- The **Translation** fields on the right side display the translated content. In these examples, pseudo-translation is displayed instead of actual translated content.

The fields displayed here depend on the fields in the content type.

3. You can click in any field to modify the content.
4. When you are done, click either **Save** or **Save as completed**:
 - Click **Save** to save your changes without completing your review of the translation.
 - Click **Save as completed** to save your changes and mark the translation as reviewed. This accepts the translation.
5. If you clicked **Save as completed**, then the job state changes to **Accepted**, and in the **Message** box, there is a new message: The translation for <job-name> has been accepted as X. where X is an abbreviation of the translated content and a link to the translated content as a separate page. The translated items are saved in Drupal.

Tip: You can click the link to view the translated content in its own page.

Important: If you do not want to accept the translation, *do not* click **Save as completed**. The translation is not saved in Drupal. Drupal TMGMT does not support rejecting a translation job and sending it back to Lionbridge onDemand. You must sign into the Lionbridge portal (<https://ondemand.lionbridge.com>) to reject the translation.

6 Other Translation Tasks

You can perform the following additional optional tasks:

- ["Aborting Translation Jobs"](#) on page 68
- ["Resubmitting Aborted Translation Jobs"](#) on page 69
- ["Deleting Jobs"](#) on page 69
- ["Editing Translated Items"](#) on page 70
- ["Sending Updates to a Translation Memory \(TM\)"](#) on page 72
- ["Redelivering a Translation Job to Drupal TMGMT"](#) on page 73

6.1 Aborting Translation Jobs

You can stop translation jobs while they are in progress, if they are in `Pending` state.

You can abort a translation job from the **Job overview** page / **Jobs** tab or from the Job page.

You can resubmit an aborted job. For detailed instructions, see ["Resubmitting Aborted Translation Jobs"](#) on page 69.

To abort a translation job from the Job overview page / Jobs tab:

1. Select **Translation > Jobs** from the menu to open the **Job overview** page / **Jobs** tab.
2. Optional. To filter the jobs in the list, select the state, source and target languages, and translation provider, and click **Apply**.

Note: The job must be in `Pending` state. You can view this in the **State** column.

3. In the **Operations** column, select **Abort** from the dropdown list.

A message confirms that you want to abort this job.

4. Click **Confirm**.

A message at the top of the page confirms that the job was aborted.

To abort a translation job from the Job page:

1. Ensure that the Job page is open. If necessary, open the **Job overview** page / **Jobs** tab, as described above, and in the **Operations** column, click **Manage** to open this page for a job in `Pending` state.

Note: On the Job page, in the **Job Items** section, the items are in `In progress` state, and in the **Provider Information** section, the status is `Pending`.

2. Scroll down to the bottom of the page and click **Abort job**.

A message confirms that you want to abort this job.

3. Click **Confirm**.

A message at the top of the page confirms that the job was aborted.

6.2 Resubmitting Aborted Translation Jobs

You can resubmit a previously aborted translation job.

To resubmit a previously aborted translation job:

1. Select **Translation > Jobs** from the menu to open the **Job overview** page (**Jobs** tab) .
2. Optional. Use the filter bar at the top of the page to locate the job to resubmit. The job is in **Aborted** state.
3. In the **Operations** column, click **Manage** to open the page for a job in **Aborted** state.
4. Scroll down to the bottom of the page and click **Resubmit**.

A message confirms that you want to resubmit this job.

5. Click **Confirm**.

A message at the top of the page states that the aborted job was duplicated, and that you can resubmit it now.

6. Optional. Modify any values on this page. For description of the values you can modify, see the description of the Checkout page in ["Submitting One Item Directly to the Connector"](#) on page 39.
7. Click **Submit to provider**.

6.3 Deleting Jobs

You can delete translation jobs in any state from Drupal TMGMT. You can delete a translation job from the **Job overview** page / **Jobs** tab or from the Job page.

Note: Deleting translation jobs does not delete translated items that have been auto accepted or reviewed and accepted.

Warning: Do not delete active translation jobs as you may lose translated content.

To delete a translation job from the Job overview page / Jobs tab:

1. Select **Translation > Jobs** from the menu to open the **Job overview** page / **Jobs** tab.
2. Optional. To filter the jobs in the list, select the state, language, and provider, and click **Apply**.
3. In the **Operations** column, click **Delete**.

A message confirms that you want to delete this job.

4. Click **Confirm**.

A message at the top of the page confirms that the job was deleted.

To delete a translation job from the Job page:

1. Ensure that the Job page is open. If necessary, open the **Job overview** page / **Jobs** tab, as described above, and in the **Operations** column, click **Manage** to open this page.
2. Scroll down to the bottom of the page and click **Delete**.
A message confirms that you want to delete this job.
3. Click **Confirm**.
A message at the top of the page confirms that the job was deleted.

6.4 Editing Translated Items

After a translation has been accepted, including auto accepted, you can still make changes to it. You edit a translated item the same way that you edit the source item, by editing the target language version of the item.

To edit a translated item:

1. Click the **Content** menu to open the **Content** page, and then in the **Operations** column, click **Edit** for the item to edit. If necessary, you can filter the list of content items by status, type (content type) and language and then click **Filter**.

The **item** is displayed in the source language, for example, English.

2. Click the **Translate** tab.

The **Translations of** page displays the translation status of each available target language for this item.

6.5 Sending Updates to a Translation Memory (TM)

After translated content returns from Lionbridge onDemand to Drupal TMGMT, you can review the translation and update it. You can then send these updates to the translation memory (TM), so that they will be available to the translation provider for subsequent translations.

During a TM update, the Connector sends both the source and target versions of the relevant content fields as XML files.

Note: If the content has not been translated, then there is no target version of it, and the Connector cannot send a TM update.

Configuring this feature

Before you can send content updates to the TM, you must configure this functionality by adding a separate *provider*. You do this by selecting the TM Update **Service Type** while creating the provider. For detailed instructions about adding a provider, see ["Adding Lionbridge onDemand as a Provider in Drupal TMGMT"](#) on page 11.

Using this feature

1. Select previously translated content to send for translation, as described in one of the following sections:
 - ["Submitting One Item Directly to the Connector"](#) on page 39.
 - ["Submitting Multiple Items Directly to the Connector"](#) on page 42.
 - ["Submitting Items in the Cart to the Connector"](#) on page 50.
2. In the **Configure Provider** section, in the `Provider` dropdown list, select the provider you created for the TM update functionality. This is described in "Configuring this feature," above.
3. Continue submitting the job according to the instructions. Instead of submitting your translation job to Lionbridge onDemand, the Connector sends the source and target versions of the content to the TM.

6.6 Redelivering a Translation Job to Drupal TMGMT

You can redeliver all the translated content in a translation job from Lionbridge onDemand to Drupal TMGMT. This is useful in the following scenarios:

- The translations were updated or corrected after the initial delivery.
- You want to overwrite any changes that you made in Drupal to the translated content.

Note: Redelivering a translation job from Lionbridge onDemand to Drupal TMGMT overwrites any post-translation edits to the translated content.

To redeliver a translation job to Drupal TMGMT:

1. Select **Translation > Jobs** from the menu.

The **Job overview** page (**Jobs** tab) opens.

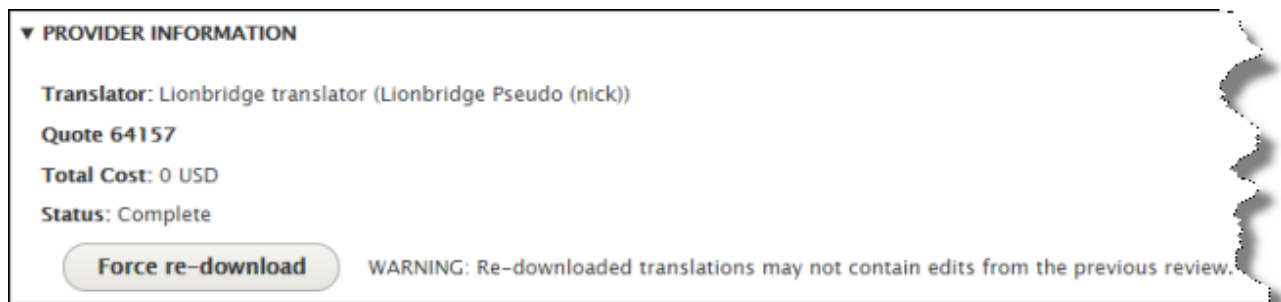

Note: There is a separate job for each target language.

2. Locate the finished job that you want to redeliver to Drupal TMGMT. In the **Progress** column, this job displays **Finished**.

Tip: To view only finished jobs, in the **State** column in the filter at the top of the list, select **Finished** from the dropdown list, and then click **Apply**.

3. In the row of the job to redeliver, in **Operations** column, click **Manage**.

The **page** for that job opens.

4. In the **Provider Information** section, click **Force re-download**.

A message box at the top of the page states that the job was submitted for redelivery, and the page updates.

- If the **Auto accept finished translations** check box is selected for the translator, the redelivered job is ready for you to *view*. For detailed instructions, see "[Viewing One Translated Job](#)" on page 64.
- If the **Auto accept finished translations** check box is cleared for the translator, the redelivered job is ready for you to review. In this scenario, you *must review* the translations and then accept or reject them.

In the Job Items section, in the Operations column, click Review, and then in the page that opens, review the translated content, and when you are done, click either **Save** or **Save as completed**. For detailed instructions, see "[Reviewing One Translated Job](#)" on page 65.
