

## Lionbridge Connector for SAP Commerce

### Version 2.4.0

# Release Notes

August 20, 2019

### Overview

Welcome to the Lionbridge Connector for SAP Commerce (Connector). The Connector enables you to automate sending and retrieving content from your SAP Commerce CMS, which dramatically reduces the effort required to create, maintain, and publish Web content in multiple languages.

### How to Contact Lionbridge Connector Support

Telephone: +1-416-363-0888

You can submit a support ticket either:

- by email: [connectors@lionbridge.com](mailto:connectors@lionbridge.com)
- from the Lionbridge Connector Zendesk page, using your web browser:  
<https://connectors.zendesk.com/>

For more information, visit:

## System Requirements

The Lionbridge Connector for SAP Commerce ("Connector") supports:

- Hybris versions 6.1 and higher
- SAP Commerce versions 18xx, 19xx, and higher
- SAP Commerce Cloud versions 18xx, 19xx, and higher

The Connector has several pre-installation requirements, described in "Before You Install" in the *Lionbridge Connector for SAP Commerce Installation and Configuration Guide*.

- On Hybris or SAP Commerce, the Connector requires Java 8.
- On SAP Commerce Cloud 19xx or higher, the Connector requires `sapmachine-jdk-11` or `oracle-jdk-11`.

The Connector has no additional hardware or software requirements beyond those of SAP Commerce.

For detailed requirements, refer to the appropriate version of the SAP Commerce documentation at [https://help.sap.com/viewer/product/SAP\\_COMMERCE\\_CLOUD/SHIP/en-US](https://help.sap.com/viewer/product/SAP_COMMERCE_CLOUD/SHIP/en-US).

<b>Memory</b>	16 GB minimum is recommended by SAP Commerce. This is recommended for the Connector to function as expected.
<b>Disk Space</b>	<ul style="list-style-type: none"><li>■ 5 GB is recommended by SAP Commerce.</li><li>■ The Connector installation requires an additional 170 MB of disk space.</li><li>■ Space for storing log files.</li></ul>

## What's New?

- The Lionbridge Connector for Hybris has been renamed to the Lionbridge Connector for SAP Commerce.
- The Connector now supports SAP Commerce and SAP Commerce Cloud.
- For `Product` and `Product` descendant item types, the **Asset Name** column in the **Job Details** page now displays the article number alongside the product name and PK number, which were previously displayed.

## Issue Fixed in This Release

Issue ID	Description
LHYB-391	Previously, when the Connector packaged content to send for translation from the Hybris Backoffice version 6.6, there were duplicate entries for the same <code>FieldContent</code> items in multiple translation items. This issue has been resolved.

## Known Issues

Issue ID	Description
LHYB-318	In the <b>Translation Settings</b> section of the <b>System Configuration</b> page, if the <b>Maximum number of items per translation file</b> or the <b>Cron Job Interval (Minutes)</b> settings has a value greater than 9999999999, an <code>Out of range</code> error message is displayed.
LHYB-368	When sending content for translation from the Hybris Product Cockpit or the Hybris WCMS Cockpit, the <code>SendToTranslationComposer</code> error message is written to the <code>Claytablet.log</code> log file. However, the Connector sends the content for translation normally.
LHYB-373	You cannot send the metadata of classification attributes for translation. For example, you cannot send the description of the <code>ProductFeature</code> product attribute for translation. This limitation occurs because this functionality is not supported by the Hybris API.
LHYB-405	While adding more attributes to a previously mapped type, the previously added attributes are removed from the mapping.
