

Clay Tablet Connector for Sitecore

Version 3.9.2

Release Notes

August 26, 2015

Overview

Welcome to the Clay Tablet Connector for Sitecore ("Connector"). The Connector enables you to automate sending and retrieving content from your Sitecore CMS, which dramatically reduces the effort required to create, maintain, and publish Web content in multiple languages

How to Contact Clay Tablet Support

Email @: support@clay-tablet.com

Telephone: +1-416-363-0888 option "3"

System Requirements

The Clay Tablet Connector for Sitecore must be installed on the machine where Sitecore is installed. The Clay Tablet Connector for Sitecore supports Sitecore versions 6.4 and higher, including all current releases.

The Clay Tablet Connector for Sitecore has no additional hardware or software requirements beyond those of Sitecore CE. For detailed requirements, refer to the appropriate version of the *Sitecore CMS Installation Guide*. This guide is available in the documentation section of the Sitecore Developer Network (SDN) site, at <http://sdn.sitecore.net/Reference.aspx>. You must log in to this site to access the documentation.

What's New?

- You can now archive jobs from the **Translation Status** window. The **Translation Statuses** section of the **CTC Translation** tab now displays the number of archived jobs and content items.
- The Connector now automatically detects when content items are not versionable. This is useful, for example, when using Sitecore's Commerce Server, which does not support multiple versions of an item. The automatic detection feature ensures that the latest translated version of an item is available in the Connector.

Issue Fixed in This Release

Issue ID	Description
SIT-145	Previously an error occurred when trying to use the Connector's enhanced Workbox with Sitecore version 7.2. This issue has been resolved.
