

Clay Tablet Translation Connector for Sitecore

Version 3.7

Release Notes

March 19, 2014

Overview

Welcome to the Clay Tablet Translation Connector for Sitecore (Connector). The Connector enables you to automate sending and retrieving content from your Sitecore CMS, which dramatically reduces the effort required to create, maintain, and publish Web content in multiple languages.

How to Contact Clay Tablet Support

Email @: support@clay-tablet.com

Telephone: +1-416-363-0888 option "3"

System Requirements

The Clay Tablet Translation Connector for Sitecore must be installed on the machine where Sitecore is installed. The Clay Tablet Translation Connector for Sitecore supports Sitecore versions 6.4 and higher, including all current releases.

The Clay Tablet Translation Connector for Sitecore has no additional hardware or software requirements beyond those of Sitecore CE. For detailed requirements, refer to the appropriate version of the *Sitecore CMS Installation Guide*. This guide is available in the documentation section of the Sitecore Developer Network (SDN) site, at <http://sdn.sitecore.net/Reference.aspx>. You must log in to this site to access the documentation.

What's New?

- Sitecore users can now see only items in the Translation Queue that they submitted. However, users assigned to the Translation Administrator role can now select the **Show queue items from all users** check box to see all items submitted to the queue. For more information about this new feature, refer to "Submitting Content for Translation from the Translation Queue" in the *Clay Tablet Translation Connector for Sitecore User Guide*.
- Sitecore users can now see the status only of translation jobs that they submitted. However, users assigned to the Translation Administrator role can now select the **Show jobs from all users** check box to see the status of all submitted jobs. For more information about this new feature, refer to "Monitoring Status for Multiple Items" in the *Clay Tablet Translation Connector for Sitecore User Guide*.

Issues Fixed in This Release

Issue ID	Description
SIT-93	In the Translation Filter window, selecting [ALL] in the Field Type column now prevents sending a field for translation. It no longer send the specified field for translation.
SIT-97	Two large jobs, each with hundreds of content items and multiple target languages, sent concurrently by the same user, are processed properly. They are no longer stuck in the "Sending" state.
